

# MPLS

## SIMPLE, POWERFUL SOLUTIONS

Be assured that Northland's regional MPLS IP/VPN network is secure, reliable, monitored and highly flexible. In addition, as a Northland business customer, you will experience unparalleled support from our dedicated expert staff, which is available 24 hours a day, each and every day of the year.

### MPLS: MULTIPROTOCOL LABEL SWITCHING

Improve and enhance multi-location connections for your business

Let Northland Communications help you take advantage of the value and efficiency that can be realized with our MPLS IP/VPN services.

For businesses with multiple locations, our MPLS IP/VPN services offer multi-point communication services in the most effective manner available by providing a fully managed private data network on top of the same network already used for voice and Internet communication services.

Northland's MPLS IP VPN offering combines the flexible connectivity and scalability of IP-based services with the security, privacy and quality of ATM and frame relay.

### HOW MPLS WORKS:

#### Secure Data Connectivity

- + Meets regulatory requirements and protects your business
- + Managed and monitored services with rapid technical response

#### Class of Service

- + QoS features with 4 traffic classes
- + Realtime designation of optimal paths for voice and mission critical data

#### Connections

- + Potential to eliminate or reduce costly private point to point connections

#### Cost Effective Network

- + Consolidates private data, voice communications and Internet bandwidth
